GROUP 1 SEES FIRST (corresponds to...)	GROUP 2 SEES FIRST (corresponds to...)
Tennis racquet (frying pan)	Frying pan (tennis racquet)
Broom (golf club)	Golf club (broom)
RANDOM IMAGE	RANDOM IMAGE
Hockey stick (axe)	Axe (hockey stick)
Spatula (baseball bat)	Baseball bat (spatula)

GROUP 1 SEES SECOND	GROUP 2 SEES SECOND
Axe	Hockey stick
Golf club	Broom
Baseball bat	Spatula
Frying pan	Tennis racquet
RANDOM IMAGE	RANDOM IMAGE

Hypothesis: It will be easier to recognize the change in Source when you saw an unexpected source instrument first as opposed to second because the “normal” image will be thought of as acceptable.

We will show them each image for 3 seconds. Then, after showing them five images, we will ask them to respond for each successive image: **“Have you seen this image before?”**
